

Power Supply Direction

General introduction:

Bemade of superior components with international hi-tech;Quality guaranteed

Application:Be applied to building talkbacks and kinds of access controllers,
especially e lectric locks and bolts

Technology Parameters

AC Input Voltage: AC 220V 50Hz

Output Voltage: DC11-14V

Output Electric Current: 5A

Output Power: 60W

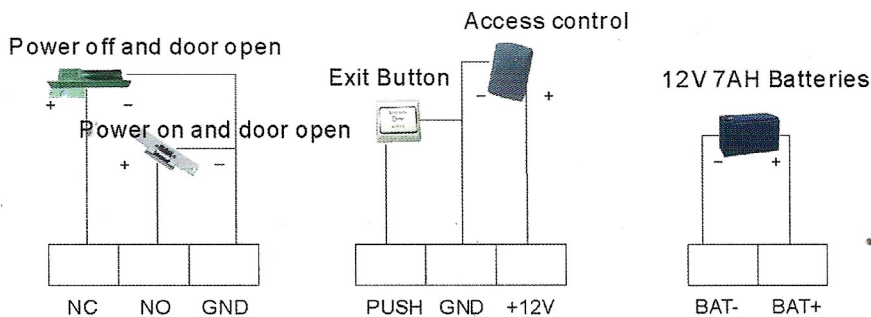

Operating Temperature: -20°C~+60°C

Operating Humidity: ≤90%

Time: 0~10s

Size: 224mm×225mm×83mm

Output terminal wiring schematic drawing:

NC and COM terminal,normally output DC 12V,press button to cut off power supply(0~10s)

NO and COM terminal,normally no output;Press button to output DC 12V(0~10s)

PUSH and COM terminal,Connect exit button or time attendance.

+12V and GNDterminal,The need for equipment 12V

UPS- and UPS+ terminal ,Which can be accessed by12V 7AHBatteries,

City short-circuit but equipment to work
